

ELAN

Straight Rail Stairlift

Manual or power folding rail

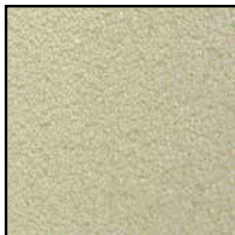

(anodized rail only)

The folding rail option is an ideal solution if there's a doorway or narrow hallway at end of the staircase. A manual feather-light operation or push-button power automation is available.

Rail color selections

Anodized - Standard

Paint - Option

Power swivel seat

Exit with ease with a power swivel seat that turns up to 90°, controlled by a rocker switch on the chair handle or the call/send remote.

Power folding footrest

Flip up the seat, and the power footrest will also fold up. Or, the power footrest can be operated from an optional arm switch. Save your back and reduce instability worries.
