- 90 degree or pass through car
- Stainless steel cab
- Custom color RAL powder coated car
- Wire rack shelves
- Key switch
- Unfinished maple or poplar wood hoistway doors

“ I appreciated the light weight, yet sturdy, material, and plug & play connections. It makes for easy one, or two-man, install. Being DC driven allowed the cab truck to move with no main power - this is an excellent feature. Also, using the same battery as standard stairlifts is convenient. No complex cable or wiring - a simple cherry switches on top, bottom, final and cam actuation. ”

Joseph Long, Med Tech
