Waupaca Elevator

Since 1957, Waupaca Elevator has built safety, quality, value, and choice into the manufacture of residential elevators.

Waupaca Elevator is a leader in producing residential elevators for the US... first to provide and listed elevator control panels, tape reader selectors on roped hydraulic units, and first use of performance enhancing variable speed controls on winding drum elevators.

Incorporated in Waupaca, Wisconsin; Waupaca Elevator began manufacturing screw-drive residential elevators and dumbwaiters. Drive systems soon evolved to winding-drum and roped hydraulics. The company moved to a larger location in Appleton, Wisconsin in 1997. After outgrowing the new location by 2002, a move to a modern 355,000 sq. ft. facility situated on 21 acres assures ample space for growth. Waupaca Elevator pursues the best technology and efficiencies to enhance the personal convenience and affordability of its residential elevators. In new home construction or remodeling, “Specify the Specialists” — Waupaca Elevator.

Designer
A popular and versatile model for those wishing to create or decorate their own car interior. This car features unfinished flush birch walls and ceiling, solid wood handrail, brushed finish stainless or muntz stations, unfinished floor, dual 4” recessed down lights with white trim rings, and a basic selection of vinyl-lam accordion gates. The Designer is also available in other wood veneers as well as a broad choice of applied laminates.

Heritage
A new look with timeless beauty, this model features textured neutral wall panels and ceiling with handcrafted hickory hardwood trim, solid wood handrail, brushed finish stainless steel or muntz stations, unfinished floor, dual 4” recessed down lights with white trim rings, and a basic selection of vinyl-lam accordion gates. The hickory trim is provided in natural finish only.

Estate
This distinctly crafted and hand finished model features oak wall panels and hardwood trim, textured neutral ceiling, solid wood handrail, brushed finished stainless steel or muntz stations, unfinished floor, dual 4” recessed down lights with white trim rings, and a basic selection of vinyl-lam accordion gates. The oak walls and trim may be finished natural, medium, dark or left unfinished. The Estate is also available in walnut or cherry wood with natural finish or left unfinished.

Estate Ltd.
This elegant, fine quality car features a hand finished cherry interior accented with polished brass fixtures. The walls and ceiling are trimmed with cherry hardwood and highlighted with our own blended finish. Natural finish and unfinished are also available. This model includes a matching handrail, kick plate and stations. Also included are four 4” recessed down lights with brass trim rings, an arched valance and unfinished floor. A clear or smoked acrylic accordion gate is standard.

A vast array of materials, styles, fixtures, and features allow you... the homeowner the opportunity to create a design uniquely your own.

We have selected an option list of the finest materials available to provide utility, elegance, value and comfort.

Raised Panel Solid Wood Cars
Our solid hardwood cars may be constructed from our standard woods or an exotic wood of your choice depending on availability. We have compiled 10 configurations of standard option panel designs. Custom designs and treatments may be considered from your drawings. Combinations of wood species offer beautiful contrast and truly unique designs.

Raised panel cars include choice of brushed or polished fixtures in stainless steel or muntz, with matching handrail. Coordinating trim rings on quad lights, matching kick plate and a clear or smoked vision panel car gate complete the standard option list.

**Features**

**QUALITY**

Waupaca Elevator products reflect our dedication to innovation and superior quality. Custom handcrafted car interiors reflect "select or better" lumber and top grade materials used by our experienced wood workers. Our electrical shop produces tested and proven controls. Our vendors are chosen with quality, stability and service in mind.

**VARIETY**

Waupaca Elevator offers one of the broadest selections of car models. We also allow you the option of designing a custom car and fixtures within code constraints for size and capacity. A variety of custom blended or Minwax stains and finishes may be selected to protect and enhance your design. From budget conscious basics, to the quest for opulence, it's your choice!

**AVAILABILITY**

Our nationwide authorized dealer network can assist with design, code compliance in your locale, installation and continuing service. Waupaca supports our valued dealer network with technical and sales support, documentation and warranties. Our leading edge facility and trained employees assure reasonable lead times and superior quality.

**SAFETY**

Safety is paramount at Waupaca Elevator. All of our elevators are designed to comply with the requirements of the National Electrical Code, ASME A17.1-2000 Part 5.3 with addenda standard for residential elevators, and most State and Local building codes. Standard safety features include a elevator control panel, emergency stop switch, emergency alarm, telephone jack, hoistway door locking device, gate safety switch, broken / slack cable safety device and emergency lowering capability.

**WARRANTY**

Your investment in a Waupaca elevator is secure with a two year limited warranty against defects in material or workmanship. Warranty labor is provided with the duration to be established by your authorized dealer. With proper maintenance, your elevator will provide many years of trouble free utility, convenience and value.

Car walls are available in Oak, Walnut, Birch, Cherry, textured neutral panels and special order woods. Finishes include natural, medium, dark or unfinished. Melamine wall options are white and light wood grain finishes. Over 100 applied laminate choices are available.

All cars feature recessed down lighting. Down lights are available in a choice of white, black, chrome or brass trim rings. Cars may be ordered minus factory lighting fixtures to allow field installation of custom lighting that will match your home décor. PLC equipped elevators include automatic lighting and homing capability.

Ceilings are available in flush wood or trimmed panels to match your car walls. Textured neutral panels, melamine, and applied laminates are also available to enhance your decorating options.

Accordion gates are provided in four standard vinyl-lam options. Smoked or clear acrylic see-through panels are an upgrade option. A power gate operator option (available only on accordion gate equipped elevators with PLC controls) adds safety and convenience. Scissors style gates in four color choices are available only as an option.

All cars are provided with an unfinished plywood floor. This feature allows for flexibility in applying carpet or other materials within weight limitations to suit your needs.

Car designs feature assembly methods and materials to assure a solid, quiet and secure environment while riding in your elevator car.

A code required phone jack for wall mounting is standard on every Waupaca elevator. An optional recessed phone box enhances style. With the phone box, your phone is hidden behind a swing open panel of matching wood, muntz or stainless steel.

Add convenience and resale value to your new or existing home.

Door Interlocks – EMI or GAL

Prevent operation of elevator with door open and prevent opening of any door when car is not at designated landing. Feature extended service life LEDs.

Add convenience and resale value to your new or existing home.

Handrails
Standard wood handrails to match your car walls add an element of safety and security to the ride of your elevator. Optional brushed or polished finish handrails are also available.

Hall Stations
Hall stations are available in finishes to match car operating panels. They include a call button with an In-Use indicator. A separate Car-Here indicator light button is available. Key locks may be added to all controls for controlled access and safety. Hall stations feature extended service life LEDs.

Car Operating Panels
Car operating panels are available in brushed muntz or stainless steel as standard with a polished finish as optional. The large buttons illuminate when pressed, to indicate a registered call. An emergency stop switch and an alarm button are provided for your safety. A car light switch is included for convenience. Car operating panels feature extended service life LEDs.

Wood Finishes
Wauqaca Elevator has traditionally offered unfinished wood products and featured our own signature stained or natural oil rubbed finish. Offerings now include lacquer resilient coatings and Minwax stains applied to selected wood products.

Those who wish to match other wood treatments in their homes may select unfinished cars. Your millwork or design professional may then match the nuances of complimenting décor.

Gates

Accordion gates are standard on all cars. Our wide selection of standard vinyl lam finishes includes light oak, white, natural oak and chalk. Optional accordion gates feature clear or bronze acrylic see through panels. Special order accordion gates are also available. A rigid metal scissor-type gate is an available option. This powder coat finish is available in black, white, toast, or gold. All scissors-type gates are hand-assembled with brass rivets.

Scissors Gates

CUSTOM-LIFT® WINDING DRUM STANDARD SPECIFICATIONS

- CAPACITY - 500LB.
- CAR SIZE - Maximum of 12 sq. ft.
- TRAVEL - up to 50 ft.
- STOPS - up to 6 stops
- SPEED - 30 feet per minute
- PIT DEPTH - 4'-6" minimum pit required

OVERHEAD - 96" above top finished floor with standard 7' car (additional overhead required with some options and configurations).

GUIDE RAIL - 5/16" precision formed steel channel

MOTOR - single speed, 2HP, instant reversing

GEARBOX - high ratio, direct mounted and coupled

DRUM - single drum with outboard bearing

BRAKE - spring applied, electrically released

TRUCK - heavy gauge steel with hi-density synthetic guides and rollers

SAFETIES - twin instantaneous type, broken rope and slack rope applied by a retained compression spring.

SUSPENSION - two 1/4" x 7x19 Wire Rope

POWER REQUIREMENTS:
- 230 volt, 30 AMP, single phase, 60 hertz.
- 208 volt, single phase supply requires a power boost transformer

CONTROLS - Push button automatic at car and landings, car light switch, in-car emergency stop switch, in-use indicator in hall stations

SIGNAL SYSTEM - wall-mounted modular phone jack, emergency alarm button in car operating panel

HOISTWAY DOOR INTERLOCKS EMI® or GAL Type "N" required at each opening.

EMERGENCY LOWERING - manual lowering device

WINDING DRUM OPTIONS

EASY RYDE - Waupaca’s name for VVF Motor control that allows seamless starts, stops, and quiet run

CAR CHOICES - all car styles available.

SHEAVES - Various sheave arrangements are available to accommodate most machine room configurations.

PLC BASED CONTROLLER WITH TAPE READER - allows automatic car lighting and homing feature.

BATTERY OPERATED EMERGENCY LIGHT AND ALARM

- CAPACITY 750LB.
- CAR SIZE - up to 12 sq. ft. net platform area
- CAPACITY 1,000 LB. CAR SIZE - up to 15 sq. ft. net platform area
- SPEED - 40 feet per minute
- WIRE ROPES 3/8" x 8x19 Standard
- BATTERY LOWERING or round trip battery option available
- PLC BASED CONTROLLER WITH TAPE READER - allows automatic car lighting and homing feature.
- IN-HOISTWAY OVERHEAD MOUNTED DRIVE AVAILABLE - contact dealer or manufacturer for details.

EXCELEVATOR™ HYDRAULIC SPECIFICATIONS

- CAPACITY - 750 LB. with CAR SIZE - up to 12 sq. ft. net platform area
- CAPACITY - 950 LB. with CAR SIZE - up to 15 sq. ft. net platform area
- TRAVEL - up to 50 ft.
- STOPS - up to 6 stops
- SPEED - 40 feet per minute
- PIT DEPTH - 4'-6" minimum pit required

OVERHEAD - 8'-4" above top finished floor with standard 7' car (additional overhead required with some options and configurations)

GUIDE RAIL - 48" machined elevator T rail

PUMP UNIT - rotary screw type with submersed motor.

MOTOR - 2.5HP. 208/230/1PH – single speed

VALVE - Adjustable 2 speed

ELECTRIC REQUIREMENTS - 208/230 volts, 30 AMP single phase, 60 hertz

- A separate 115-volt 15 AMP circuit is required for car lighting.

CAR FRAME - full height with synthetic guides and rollers

SAFETIES - twin instantaneous type, A slack rope safety.

SUSPENSION - two 3/8" x 19 wire ropes.

CONTROLS - Push button automatic at car and landings, car light switch, in-car emergency stop switch, emergency alarm button, in-use indicator in hall stations.

Controller is PLC based

SIGNAL SYSTEM - wall-mounted modular phone jack, emergency alarm button on car operating panel

HOISTWAY DOOR INTERLOCKS EMI® or GAL Type "N" required at each opening.

EMERGENCY LOWERING - floor selectable descent with battery back-up power supply.

Place
We all live somewhere. Luxurious homes on spacious grounds, town homes in comfortable neighborhood surroundings, condominiums where maintenance is provided in a cozy space. Waupaca Elevator Company, Inc. has an elevator for your Place!

Lifestyle
Lifestyles vary significantly across age and social demographics. The common thread is that we are all advised that staying active, mobile, and engaged in life benefits our physical and social well-being. Waupaca Elevator Company, Inc. products enable an active Lifestyle in and out of places we live!

Quality
Is a virtue in everything that we do, think, and pursue whether tangible or intangible. Quality is an integral part of the products we buy, the services we procure, food we consume, and our interactions with our peers, family, and customers. Waupaca Elevator Company, Inc. is a standard bearer for Quality in residential elevators and dumbwaiters!

Choice
As a long-established and recognized leader in the home elevator industry, Waupaca Elevator Company, Inc. has consistently brought choice and value to their customers. From elaborately customized cars with exotic wood and materials to the attractive but basic veneer walled car, drive system alternatives, car sizes and configurations, as well as amenities, may be chosen to meet your lifestyle. Waupaca Elevator Company, Inc. offers you Choice!

Value
Is considered to be the performance, function, or utility that is received in exchange for a price. Our highest value is placed on safety. Above all the product must be safe! Other attributes are quality, price, flexibility in design, and integrity in service. Above all, Waupaca Elevator Company, Inc. is Value!
