Preventive Maintenance Program

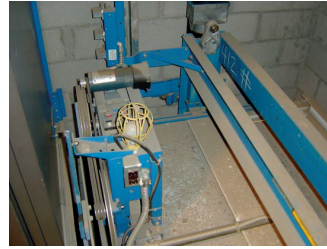

Looking for a Western Slope owned and operated elevator company with great customer service? Are your elevator maintenance costs increasing? Are you paying for monthly maintenance or monthly “Exams”? What does your elevator equipment look like?

“Exam” maintained

CCEL maintained

“Exam” maintained

CCEL maintained

The major elevator companies have changed the language in their service contracts over the years from “Preventive Maintenance” to technically vague terms such as “Exam” or “Routine”. Not using industry standard terminology leaves room for them to define what an “Exam” entails?

Colorado Custom Elevator & Lift Affordable Preventive Maintenance Programs.

Colorado Custom Elevator and Lift’s recommended approach to elevator maintenance is to focus on preventive maintenance, including regular on site visits on a monthly, quarterly, semiannual or annual basis depending on the characteristics of the elevator being serviced.

With a full preventive maintenance program in place, many elevators will be in service for 20 years or more before requiring a major modernization expenditure or replacement.

Regular onsite preventive maintenance has several benefits:

- It provides a higher level of reliability by addressing issues before they result in shut-downs.
- It extends the service life of the elevator by replacing or repairing parts before they cause additional wear on other components.
- It allows for better financial budget planning by easing expenses rather than incurring unplanned repairs.
